An earthquake is
caused by stress along
a fault. Stress
increases until the

Access Free Earthquakes Guided And Study

rocks break and release stored energy.

- The place where rocks break and cause an earthquake is called the focus (FOHkus).

The point on the surface directly above the focus is called the epicenter (EPuh sen tur).

Earthquakes and Seismic Waves

Earthquake hazard tells how likely it is that a place will have a

Access Free Earthquakes Guided And Study Answers

damaging earthquake in the future. Scientists look to the past to figure out earthquake-hazard levels. A place that has had a lot of strong earthquakes in the past has a high earthquake-hazard level. A place that has had few or no earthquakes has a much lower level.

with a shallow depth of focus are usually more damaging because it is closer to the earth's surface. Where do 80% of all earthquakes occur? Circum Pacific Belt of the "Ring of Fire"

Chapter 19 Study Guide: Earthquakes Flashcards | Quizlet

Scientists rate quakes on the Richter scale, invented by Beno Gutenberg and Charles

Access Free Earthquakes Guided And Study

Richter in 1935. Each level on the scale represents a quake 10 times more powerful than the level below. For example, a quake rated at 3 is 10 times more powerful than one rated at 2. Earthquakes aren't very destructive until they reach about 5 on the scale.
