Participatory Research In

Read Free Participatory Research In **Palliative Care**

Participatory research is a relatively new method of researching practice especially within palliative care. It differs from other methodologies in that there is an expectation of action within the research process. The values that underpin participatory research are collaboration, empowerment, and reflection.

This review describes past studies that adopted the approach of community-based participatory research to identify implications for future research to address palliative and end-of-life care needs in underserved communities. Four major databases were used to search for studies that met the inclusion criteria.
