new york for sale "keyboard" - craigslist

One major difference between keyboard and piano is with the keys themselves. Piano keys are heavier and carry behind them the weight of the hammers. Playing piano may feel more organic, as the pressure applied affects the dynamics of the piece. This gives pianos significantly more control in terms of dynamics and musicality.

What is the Difference Between Keyboard and Piano?

All piano chords contain a root note -- this is the note the chord is named after -- as well as one or more additional notes. Basic piano chords often consist of only two or three notes, while the more advanced chords tend to incorporate even more notes. The most common type of keyboard or piano chord is a triad, or three-note chord.
