Newly planted tree phase - these trees are still babies and should have only minimal applications of a quick release fertilizer and more of a type that releases slowly. High nitrogen release rates on newly planted trees will burn roots and leaves on contact. Note: Liquid and fully composted fertilizers have the fastest release rates while slow release forms tend to be granular and less water ...

When and How Do I Fertilize Trees?

In botany, a tree would be defined as a perennial plant that has an elongated trunk or a stem with supporting leaves and branches. However, the definition of a tree is not just limited to a taxonomic group. Instead, it includes a different variety of plants that have grown independently with branches and a trunk that allows them to become taller than other plants.

60 Different Types of Trees (Names, Photos and More)

You can choose from fruit and citrus, tree and shrub, and evergreen varieties based on your garden. There is also room to customize how many spikes you want to buy with options from 5-160 spikes. When using this product, it's good to know that these spikes work in a slow-release format.
