## **Meteorology**

For meteorologists, the first step in studying the atmosphere is making observations. Commonly, meteorologists display these observations in something called a station model (check out the example on the right), which is a graphical template showing current weather conditions at a weather station (often located at an airport). Over the next couple of sections, I'm going to introduce you to the ...

try out different wind speeds and examine the resulting group of wind barbs. Remember that a long barb counts for 10 knots, a small barb for 5 knots, and a black triangle for 50 knots.

## **Watching the Wind | Learning Weather at Penn State Meteorology**

In meteorology, station models are symbolic illustrations showing the weather occurring at a given reporting station. Meteorologists created the station model to fit a number of weather elements into a small space on weather maps. This allows map users to analyze patterns in atmospheric pressure, temperature, wind speed and direction, cloud cover, precipitation, and other parameters.
